- **DumbWays.id**
Fullstack Developer | Mar 2021 - Apr 2021
 - Learning React.js
 - Make Rest API with Express.js
 - Make Android with React Native

WaysFood

- Express.js
- React.js

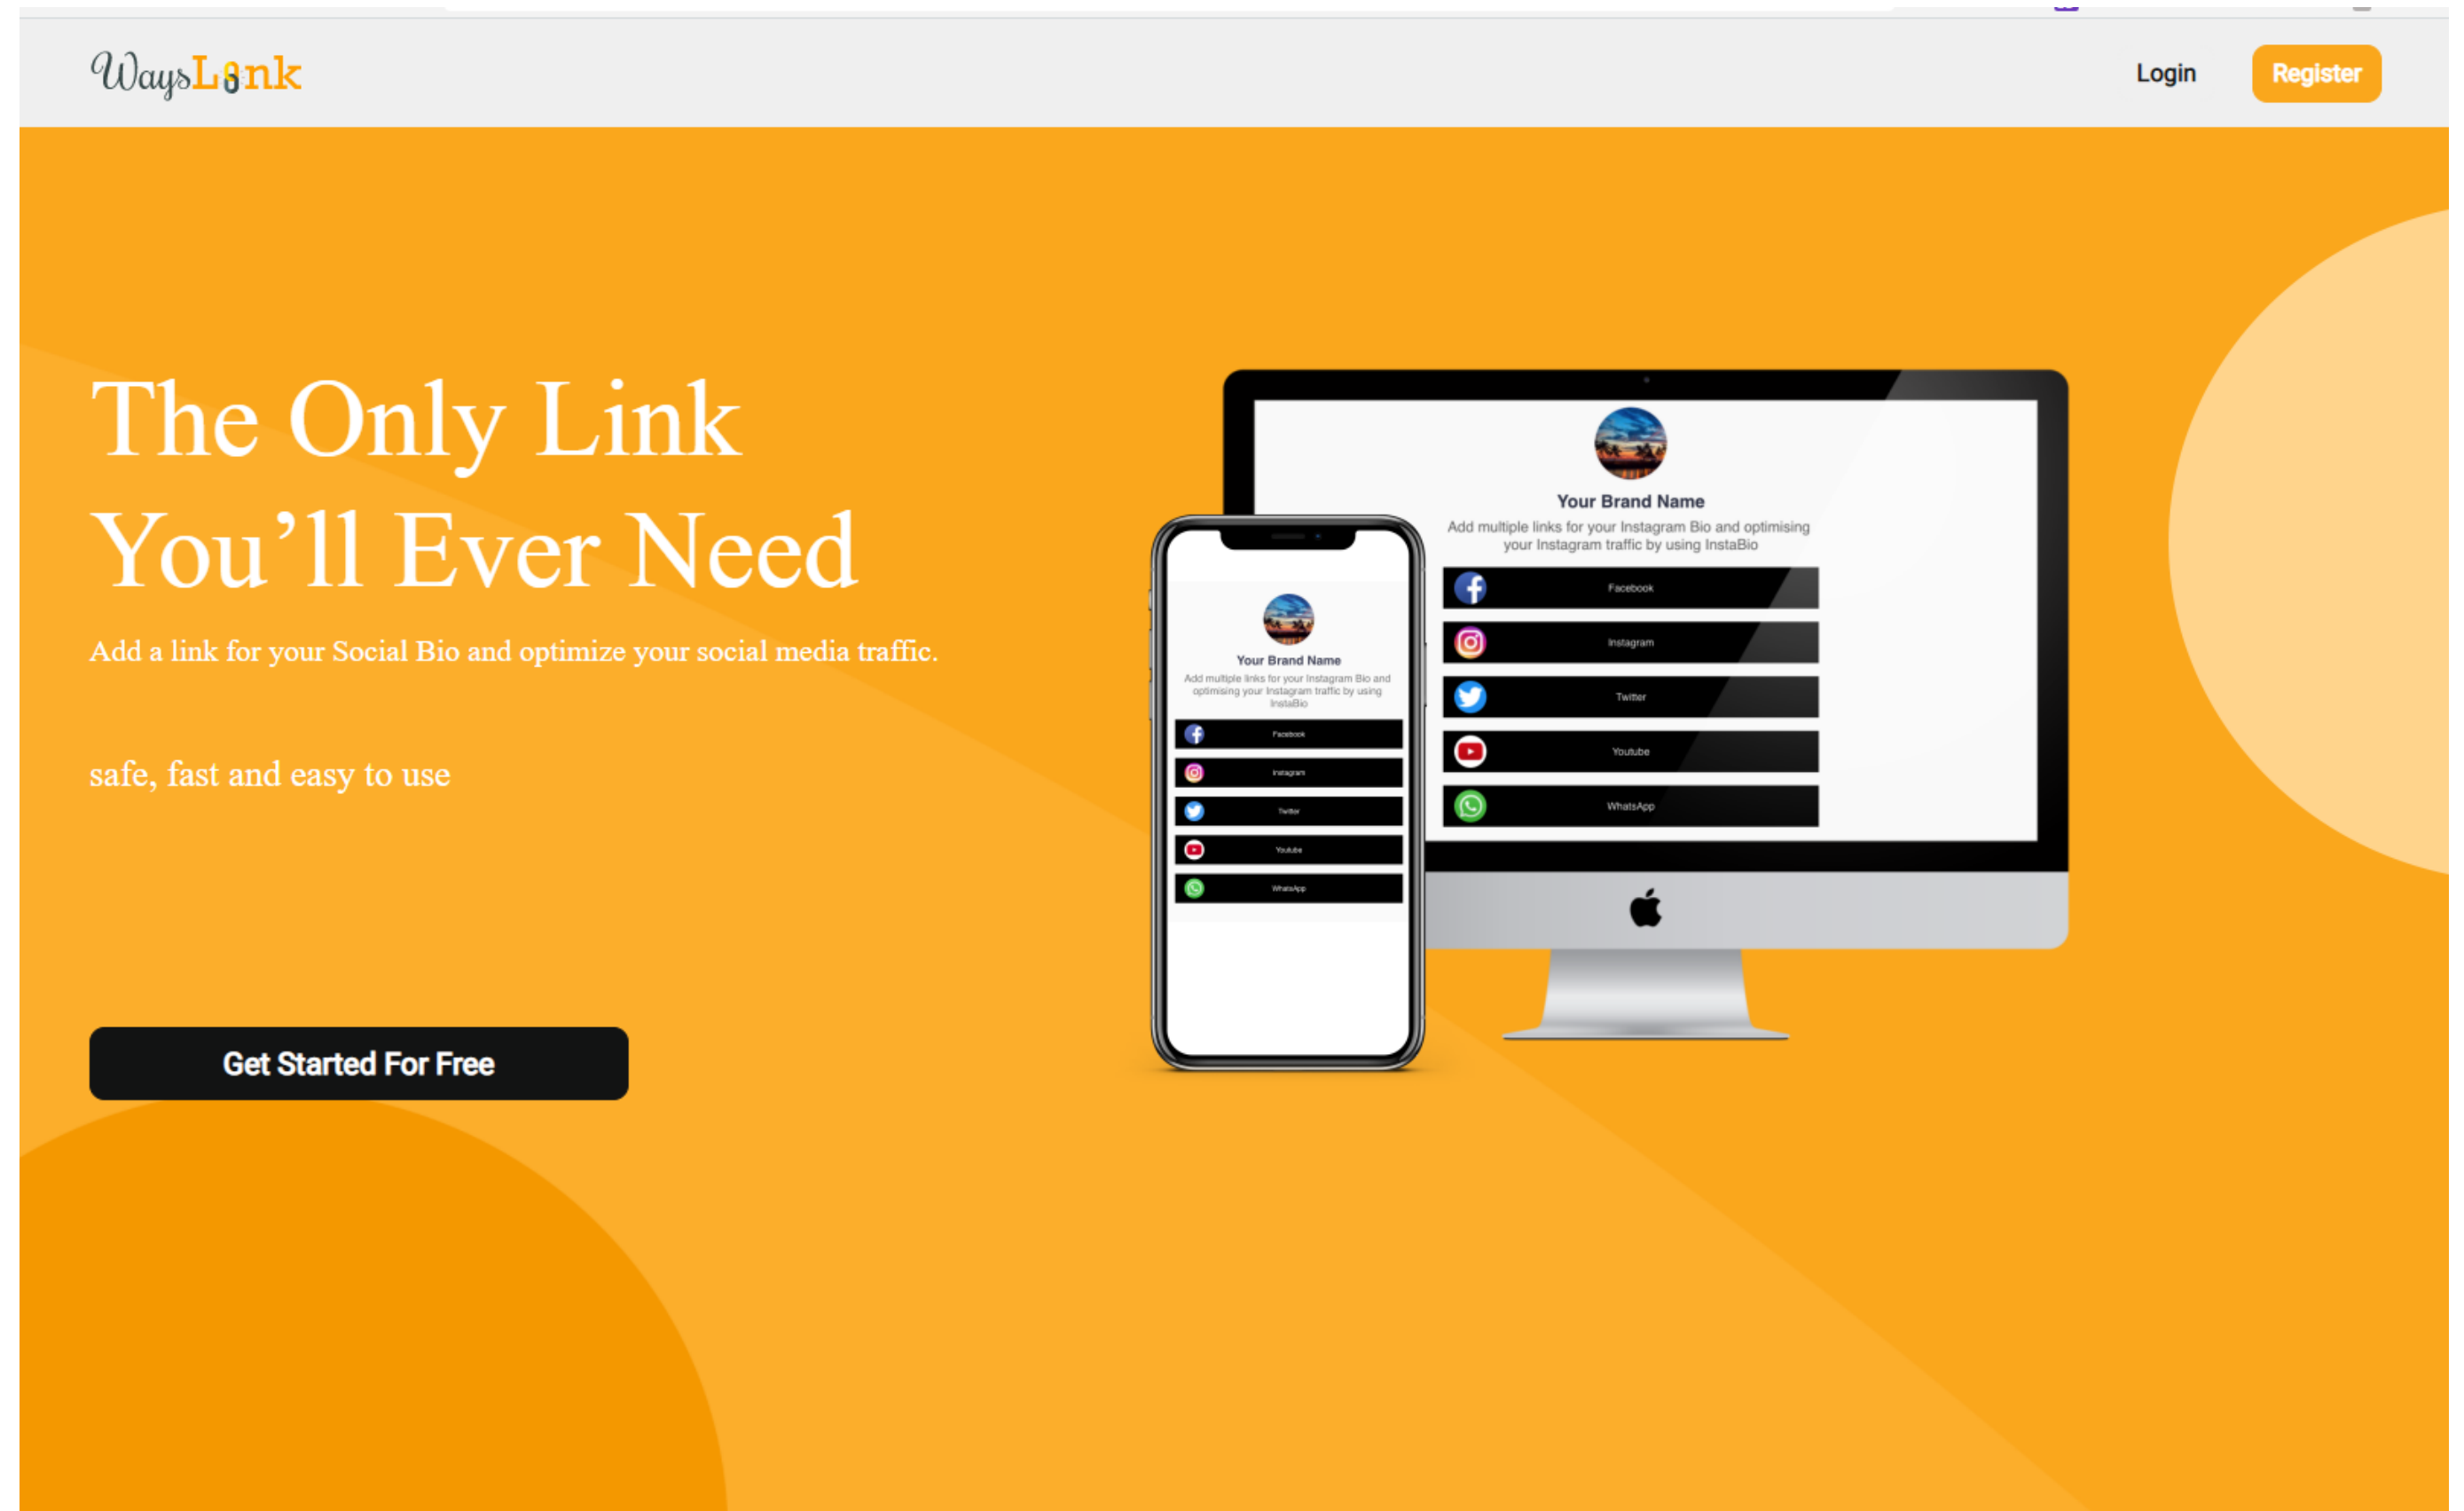

An application for food delivery in Indonesia

WaysLink

- Express.js
- React.js

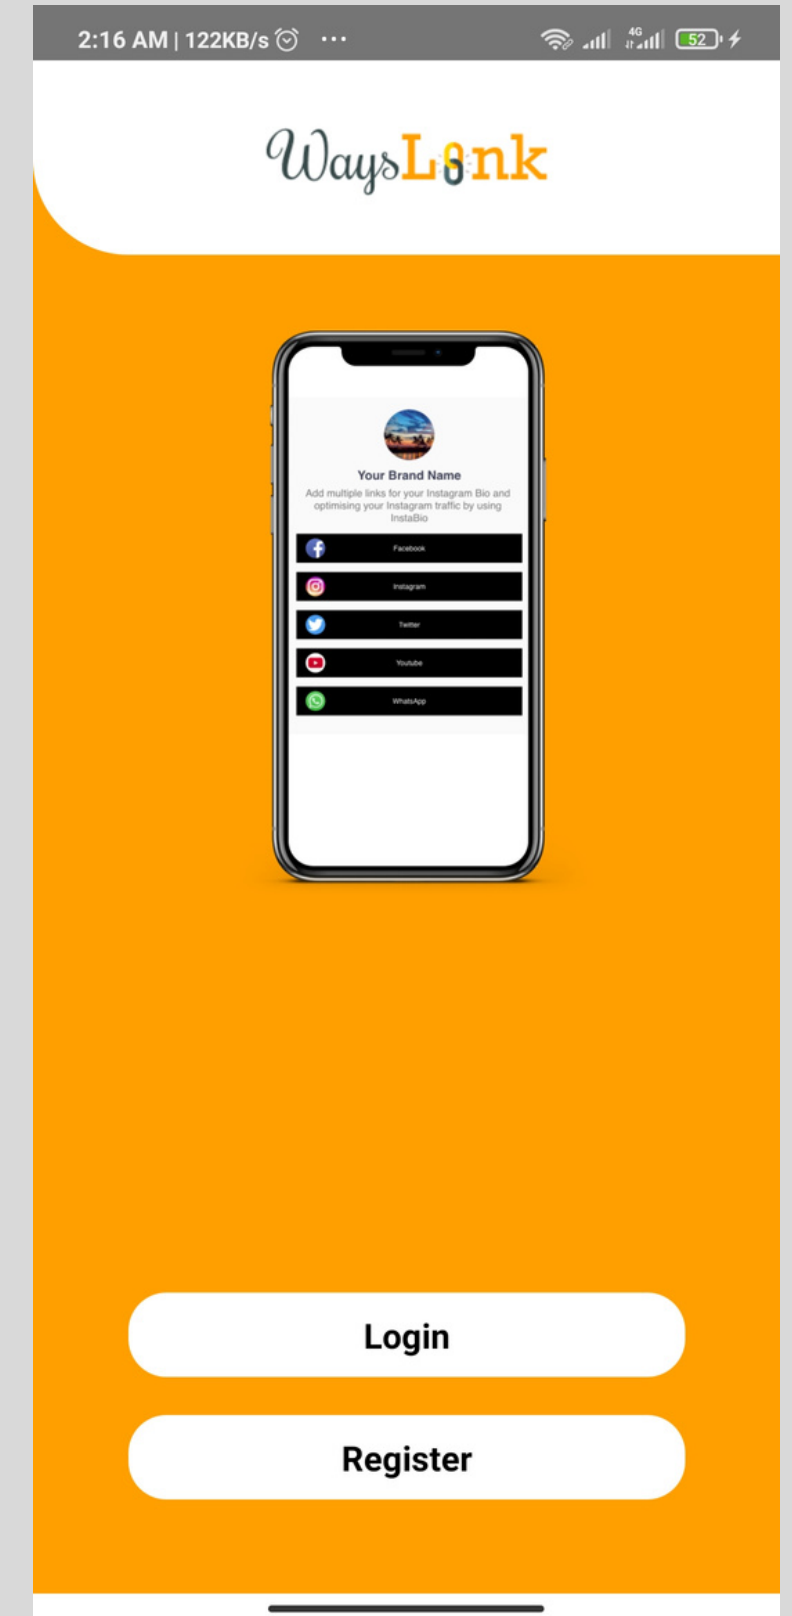

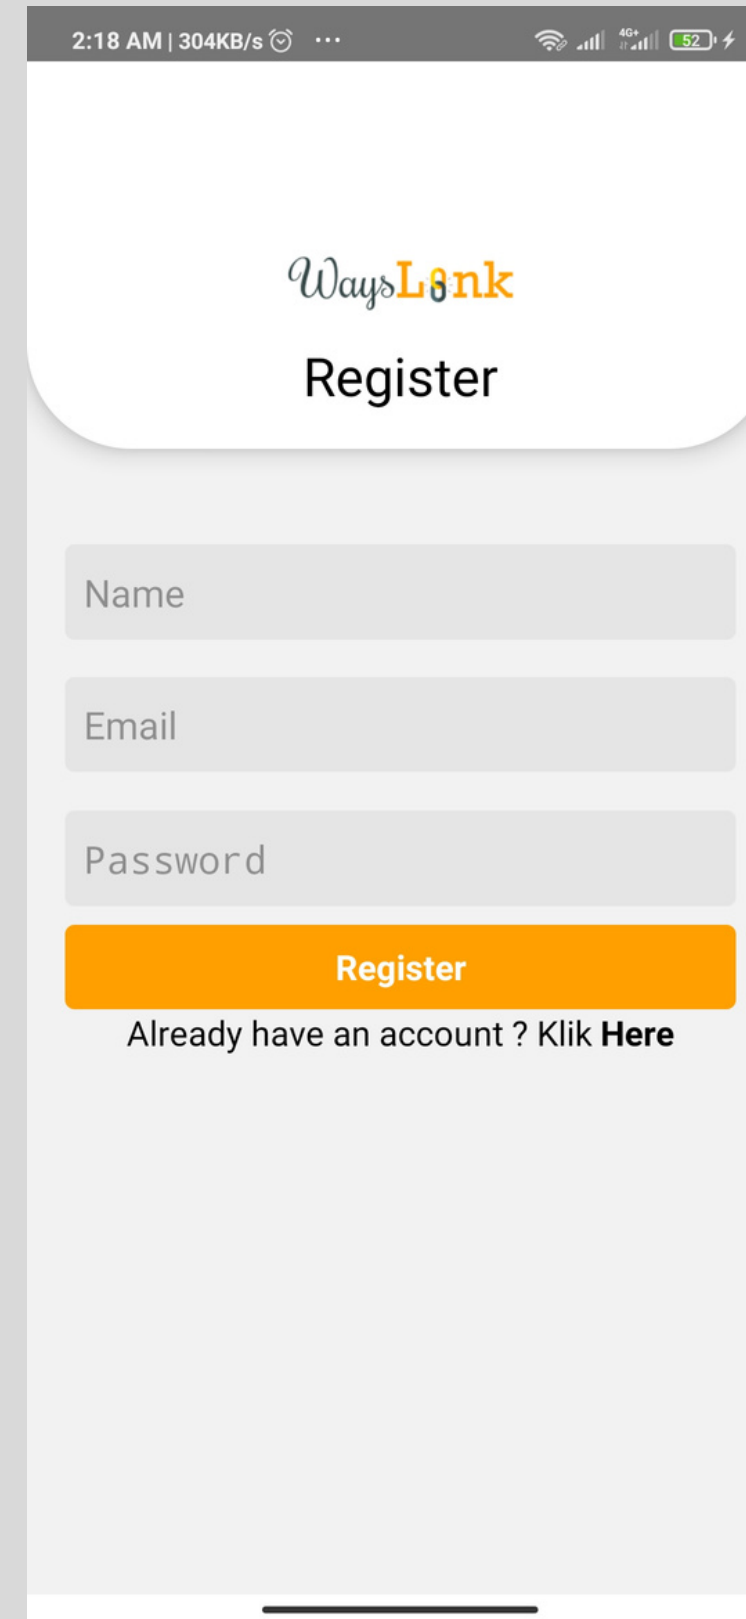

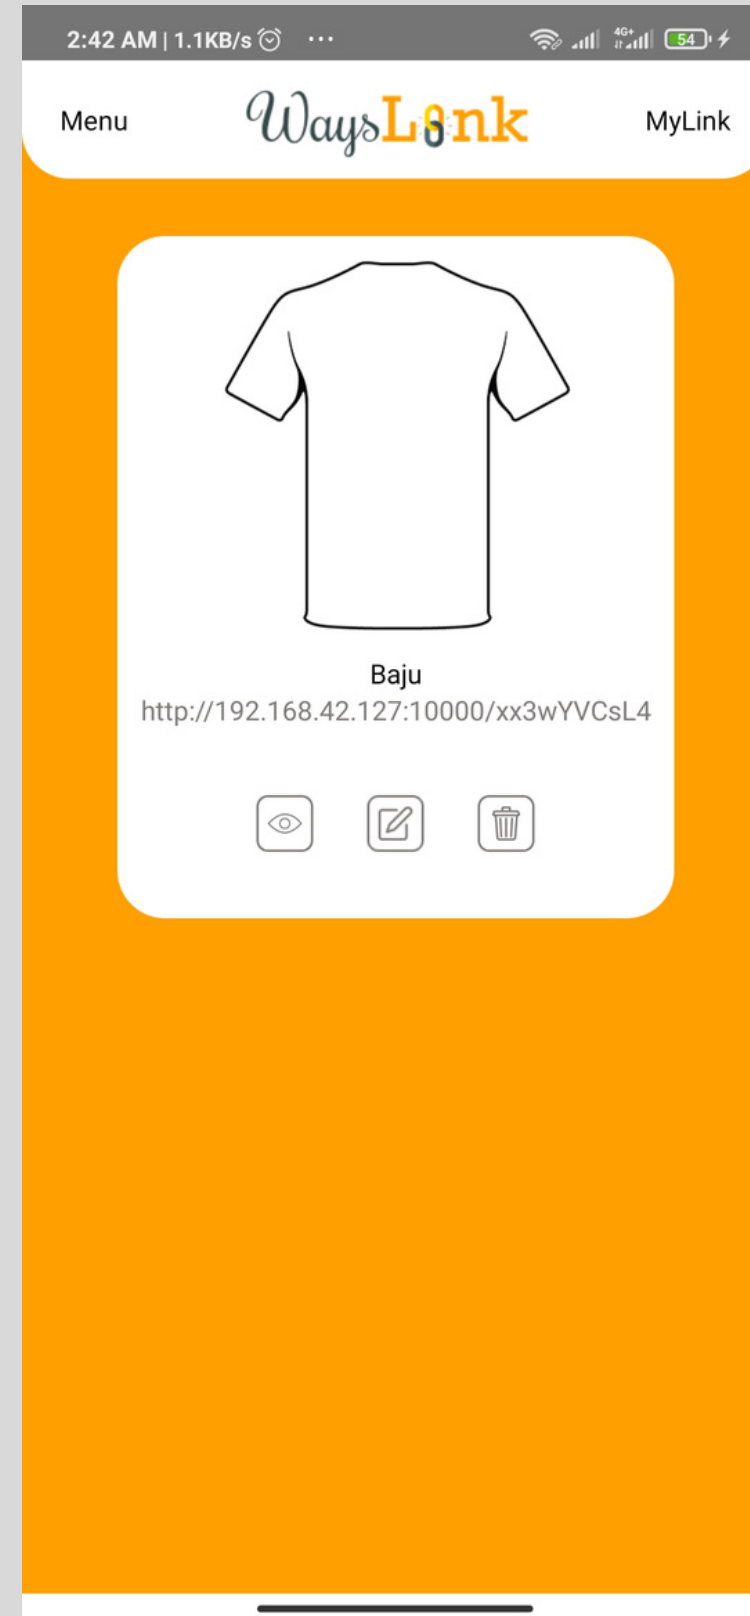

tools to maximize
several social media
combined into one

The image shows the landing page of the WaysLink website. The page has a bright orange background with large, abstract circular shapes. At the top, there is a navigation bar with the 'WaysLink' logo on the left and 'Login' and 'Register' buttons on the right. The main heading in the center reads 'The Only Link You'll Ever Need' in a large, white, serif font. Below this, a sub-headline says 'Add a link for your Social Bio and optimize your social media traffic.' in a smaller, white, sans-serif font. Further down, the text 'safe, fast and easy to use' is displayed in a white, sans-serif font. A prominent black button with the text 'Get Started For Free' in white is positioned below the text. To the right of the text, there is a visual representation of the service: a smartphone and a desktop monitor. Both devices display a user interface for 'Your Brand Name', which includes a profile picture, a bio, and a list of social media links (Facebook, Instagram, Twitter, YouTube, WhatsApp) with corresponding icons. The desktop monitor also shows a description: 'Add multiple links for your Instagram Bio and optimising your Instagram traffic by using InstaBio'.
